SIEBRECHT & SON.

Our house of *Kentia Belmoreana*, 20 x 240 feet, showing the greatest stock of this Palm in the United States.

Palms.

28 HOUSES.

Palms and Ferns are our Leading Specialties. We have the largest and finest assortment of Palms in the country; in another year we can challenge the world to equal our stock.

To produce the finest Palms grown has at all times been our aim. Our success is demonstrated by the fact that our stock is noted (1) for being the best in assortment; (2) for being well grown, cool grown, and in fine shape; (3) for justifying all claims made for it in continued public inspection.

One suggestion we offer to the trade. Do not at all times be governed by prices rather than the quality of stock. If you are buying stock to grow on, or to stock your houses, compare ours with others, and we feel confident that your order will be given us.

Kentias being our leading specialty, we would ask especial attention to this section of our stock. It cannot be duplicated in this country, probably not in the world.
